*CI-03B Normal Price £620
Trade in an old Fujikura
CT-20 or equivalent and we
will give you £100 discount.*

Prices exclude VAT

The CI-02 and CI-03 use an Oil damper system in order to overcome cleaver cleaving quality problems. Oil damper systems cleave at a steady speed without any stress to the fibre.

The Oil damper single action cleavers also includes a flexible clamping system to prevent vibration shock to the fibre during the cleaving process. This gives a dramatic quality improvement in cleaved end face, core cracking, cleave angle and life span of the blade.

Ilsintech cleavers have been designed for ease of use with an easy clamp mechanism, single action and in addition the CI-03 has a large sharps bin for convenience. The cleavers are also easily cleaned and maintained. The CI-02 and CI-03 employ an oil damper system which produces better cleaves.

Also available are replacement blades for most high precision cleavers and replacement electrodes – *call or email us for a quotation.*
